## Wireless, Real-time Temperature Monitoring System

### BENEFITS AND FEATURES:

- No need to write PLC code to display the temperature data.
- Communicates to Wyze Temp Base Readers.
- Settable thresholds can be set to turn the temperature background color a different value for easily determining which probes reach their threshold.
- Display battery condition of each temperature probe.
- Exporting to Excel, SQL server, CVS, and others available.
- Supported by the Matrix Product Development team.
